

NORAXON[®] BIOFEEDBACK

EMG biofeedback app for real-time muscle activity training and rehabilitation – intuitive, wireless, and built for clinical practice.

NOW AVAILABLE ON iOS

Trusted by clinicians worldwide, the Noraxon Biofeedback App transforms EMG into a practical tool for rehabilitation, therapy, and performance applications.

Instant Wireless Setup

Connect Ultium or Core EMG sensors via Bluetooth and begin measuring muscle activity immediately.

Real-Time EMG Visualization

Display activation and relaxation patterns to guide training and rehabilitation sessions.

Objective Reporting

Create clear, data-driven reports for rehab progress, therapy planning, and performance tracking.

Streamlined Clinical Workflow

Intuitive interface reduces setup time and helps clinicians focus on effective treatment.

Versatile Use Cases

Supports rehab, physical therapy, neurorehab, occupational therapy, and performance training.

Built for Clinicians

Professional-grade EMG biofeedback tool designed for therapy, research, and clinical practice.
